1. The following is an Examiner's Statement of Reasons for Allowance:

The prior art fails to disclose a microphone array apparatus which particular including a microphone array having microphones; a signal estimator which estimates positions of a plurality of estimated microphones in accordance with intervals at which the microphones are arranged by using output signals of the microphones and a velocity of sound and which outputs the further output signals of the plurality of estimated microphones estimated to be at the positions together with the output signals of the microphones forming the microphone array; and a synchronous adder which aligns phases of the output signals of the microphones and the further output signals of the plurality of estimated microphones and then adds the output signals and the further output signals. The specific details regarding the signal estimator that estimates positions of a plurality of estimated microphones and the synchronous adder for aligns phases of the microphone and the estimated microphone signals are explained on page 30, line 21-page 32, line 32 of the specification and also Figure 19. The cited prior art references in the previous office actions show various microphone apparatus or
